MEMORANDUM FOR: Inspector General
Director of Personnel

SUBJECT : The Forgotten Class

25X1

Attached is a note I recently sent to Bill Colby in his capacity as Executive Secretary of the Management Committee. At [] suggestion, I am sending a copy to both of you. As explained in the note, I am not trying to make an out-of-channels appeal in an individual case but I do believe that the history of the gentleman in question [] provides a near perfect example of the difficulties that have beset a class of employees who -- at the Agency's request -- have accepted extended details from their parent components against whose rolls they continued to be charged. For reasons explained in my memorandum, it seems essential to me that, at a minimum, appropriate management and administrative steps be taken to ensure that this type of problem is not permitted to arise in the future. Unless such steps are taken, we will not be able to implement a policy of cross-fertilization along the lines that the Director and his designated successor have both indicated they feel should be pursued.
